Haplogroup E																																			
<i>ADAMTHWAITE testers in E Haplogroup - these three ADAMTHWAITE lines are all a good match at 37 markers - with a 92% probability that they shared a common ancestor within the past 16 generations - however, we have not yet been able to identify the shared ancestry through traditional genealogy</i>						<i>MODE for this subgroup</i>																													
263843	ADAMTHWAITE BLUE line	Wm Adamthwaite, b~1774, Appleby?, WES	England	E-M78	(1)	13	24	13	10	17-17	11	12	12	13	11	30	15	9-9	11	11	26	14	19	32	14-16-17-18	9	10	19-21	17	12	17	21	32-33	11	10
